

# ND Plastic filters

## ND Plastic filters

**Primary applications:** for drip and micro-sprinkler systems in residential and public gardens, parks and hotels

**Main features**

- Wide range of filters, from 3/4" to 3"
- Large filter surface for continuous operation without opening and cleaning the filter
- User-friendly maintenance: all parts can disassembled for cleaning
- Optional filtration components: screen or disk with range of filtration levels
- Minimal head loss even at high flow rates

**Technical data**

Standard 120 mesh

Max. working pressure: 6.0 bar

Wetted diameter (m) at 2.0 bar

Filter	Cat. no.	Diameter inlet-outlet mm	Flow rate m <sup>3</sup> /h	Weight kg	Screen area cm <sup>2</sup>	Screen area-disc cm <sup>2</sup>
